Consulting One Connect

Business Networking Made Easy

To ensure network efficiency, availability and ROI, more and more companies have discovered that outsourcing network operations simply makes sense. The Connect Series brings clarity to Managed Network Services by providing customers a suite of offerings packaged according to the customer's precise needs.

The Connect Series provides four distinct levels of coverage that allows customers to select the ideal level of services for their specific operations environment and budget

Connect Services:

- Internet Connect
- VPN Connect
- Co-Managed Network
- Managed Network
- Optional Services

Consulting One Internet Connect

COST-EFFECTIVE SINGLE SITE, USE YOUR HARDWARE OR OURS, UTILISATION REPORTING, ALL CONFIGURATION AND UPDATES INCLUDED

The Consulting One **Internet Connect** is ideal for small organisations with a single Internet connection that desire a high quality Internet connection with a single point of contact. Outright own your own compatible router or have us supply a fully-managed device with the flexibility to exchange hardware as your needs evolve.

Consulting One Internet Connect includes:

- Solution Design
- Simple Annual Billing
- Installation Services
- Utilisation Reports
- Helpdesk Support
- Maintenance Included

Consulting One VPN Connect

COST-EFFECTIVE MULTI-SITE, SECURE, USE YOUR HARDWARE OR OURS, UTILISATION REPORTING, ALL CONFIGURATION AND UPDATES INCLUDED

Consulting One **VPN Connect** is designed for customers who desire the same services as Internet Connect and have multiple sites to connect together. Our VPN services have proven to be a cost-effective alternative to costly dedicated private wide-area networks.

- Internet connectivity at each site plus site-to-site VPN
- Traffic Prioritisation (QoS) where possible

Consulting One Co-Managed Network

NETWORK MONITORING WHEN YOU HAVE YOUR OWN INFRASTRUCTURE AND SUPPORT STAFF, ALERT NOTIFICATION 24x7, MULTI-VENDOR, SIMPLE NO-HASSLE PAYG ESCALATIONS

Consulting One **Co-Managed Networks** are ideally suited to customers with a pre-existing network solution and trained IT staff, and require a cost-effective monitoring and alerting system.

- Customer maintains all control of configuration
- Customer responds to, and manages alerts
- Escalation available for some or all events

Consulting One Managed Network

NETWORK DESIGN, COMPLETE MANAGEMENT AND SUPPORT OF YOUR INFRASTRUCTURE, VENDOR MANAGEMENT, WORRY-FREE SOLUTION, SIMPLE MONTHLY BILLING

Consulting One **Managed Network** is perfect for organisations with substantial investments into LAN or WAN infrastructure who desire ongoing professional management of their resources.

Our services provide customers with a full lifecycle network design, implementation, operations and management. Our solution design provides a complete review of business, security and bandwidth requirements – including analysis of broadband connectivity from multiple sources – to deliver the most reliable, secure and cost-effective network available.

Value-added Services

A variety of value-added services are available for all solutions including:

- **Managed Security Infrastructure** including Unified Threat Management (Anti-Virus, Anti-Spam, Content Filtering) and Secure Remote Access
- **Managed Wi-Fi** for small business right through to enterprise-class solutions
- **Compliance and Security** including network scanning, penetration and vulnerability testing

Vendor Support

QUALITY INFRASTRUCTURE AND MANAGEMENT, MULTI-VENDOR

To ensure that every client has a network that is right for its unique environment, Consulting One works with a broad range of telephony and Internet service providers. We are not commercially aligned with any particular provider and are therefore free to recommend the best solutions. With decades of experience within our team you're assured of excellent technical support and the peace of mind that comes from having a single point of contact for everything from implementation and management, to security, billing and support.
