

The Smartest Backup Solution Ever

A Safe and Secure Backup Solution

Consulting One's Smart Backup solution delivers the benefits of traditional local backups with the peace of mind and practicality of an off-site backup.

Our Smart Backup solution installs on your servers or workstations and backs up to a local storage drive, and then pushes the backup to an off-site location for secure long-term backup and archival. For a flat monthly fee be assured that your valuable data is being constantly backed up and monitored.

- ❖ Automatically tracks changes to files and only backs up what is necessary. Smaller backups and less data transfer;
- ❖ Throttles Internet usage and backs up outside business hours to avoid disrupting any business operation;
- ❖ Backups run even if the Internet is down. When the connection is restored the changes are automatically synced;
- ❖ Automatic and free monthly snapshots for point-in-time recovery;
- ❖ Extremely secure;
- ❖ A fully-managed worry-free solution with simple monthly fee.
- ❖ Let us take care of all the details and never have to swap another backup tape or backup drive again;

- ❖ Subscription-based with a simple monthly payment
- ❖ Low once-off setup fee. If you have an existing backup product we'll upgrade it
- ❖ Runs on any version of Windows or Mac
- ❖ Self-updates so there's nothing for you to do
- ❖ Worry-Free & Hassle-Free
