Consulting One Web Hosting

Web | DNS | Domain Management

Businesses have many options when it comes to managing Internet domain names and hosting websites. Many providers offer differing products at differing price points and in many cases it may not be clear what you are actually getting, or if it even represents good value.

Since 2006 our customers have entrusted their domain name management and hosting needs to us, allowing us to provide a simplified worry-free experience at competitive market prices. We can manage the domain name registration and renewal of all of your domains, the DNS zone hosting, website hosting, or any combination you wish.

- No setup or migration fees for simple sites on 3 year agreements;
- We manage the domain name and renew it automatically so it will never expire again;
- We can host DNS for “additional” domain names that you reserve for the future, or do not need websites for;
- Full web hosting features, along with support for PHP/MySQL and a myriad of other technologies;
- A fully-managed worry-free solution with a simple annual hosting fee – with a 60 day opt out period;

Web Hosting:

- Domain Name Registration and Renewal
- DNS Hosting
- Web/Email Hosting
- Simple annual fee
- 60 day opt out
- Very competitive pricing
- Worry-Free and Hassle-Free
